

SHUBHAM SINGH

8756321085 | shubhamsingh270218@gmail.com | [LinkedIn](#) | [GitHub](#) | Lucknow, UP, India

PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate and AI/ML enthusiast with hands-on experience in full stack web development. Proficient in Python, React, and Node.js with a strong foundation in machine learning, data analysis, and RESTful API design. Hackathon participant with a proven ability to build impactful, end-to-end solutions under pressure.

EDUCATION

B.Tech in Computer Science & Engineering

2023 – 2027

Dr. APJ Abdul Kalam Technical University, Lucknow, Uttar Pradesh

Intermediate (Class XII) — St. Ann's Day Inter College, Lucknow

UP Board | Completed 2023

St. Ann's Day Inter College, Lucknow, Uttar Pradesh

TECHNICAL SKILLS

Programming Languages: C++, Python, SQL, JavaScript

Web & Full Stack: HTML, CSS, React.js, Node.js, REST APIs, MongoDB, Express.js

AI / ML & Data: Machine Learning, NLP, Data Analysis, Scikit-learn, Pandas, NumPy

Developer Tools: Git, GitHub, VS Code

PROJECTS

AI Chat Application

React.js | Node.js | NLP

- Developed a full-stack real-time AI chat application using React.js and Node.js, integrating NLP-based response generation to handle 500+ concurrent user sessions.
- Implemented WebSocket communication to achieve sub-100ms message latency, improving user engagement by 40%.

Video Conferencing App

React.js | WebRTC | Node.js

- Built a scalable peer-to-peer video conferencing platform supporting multi-user rooms, screen sharing, and real-time chat using WebRTC and Socket.IO.
- Designed a responsive frontend with React.js, reducing latency by 30% through optimized signaling server architecture.

AI Disease Prediction System

Python | Machine Learning | Scikit-learn

- Implemented a supervised machine learning classification model achieving 92% accuracy in predicting diseases based on patient symptom data.
- Engineered data preprocessing pipelines using Pandas and NumPy, handling 10,000+ records, and deployed the model via a Flask REST API.

Movie Recommendation System (NLP)

Python | NLP | Pandas

- Developed a content-based recommendation engine using TF-IDF vectorization and cosine similarity, delivering personalized suggestions across a 5,000+ movie dataset with 85% user satisfaction.

Harry Potter Clock Project

IoT | Python | Hardware

- Built an IoT-based smart clock system using Python and hardware integration, demonstrating real-time data processing and embedded systems programming.

EXPERIENCE

Web Developer Intern — CodSoft

Remote | 2024

- Developed and deployed responsive web applications using HTML, CSS, JavaScript, and React.js, improving load performance by 25%.
- Collaborated with cross-functional teams to deliver 3 client-facing projects within sprint deadlines.

Technology Job Simulation — Deloitte (Forage)

Virtual | 2024

- Completed a technology consulting simulation involving data analysis, software engineering tasks, and full stack development scenarios reflecting real-world Deloitte project workflows.

CERTIFICATIONS & ACHIEVEMENTS

- Participant — HackStrom Hackathon (MMMut Gorakhpur): Developed a technical solution in a competitive hackathon environment, gaining hands-on experience in rapid prototyping and collaborative problem solving.
- Participant & Achiever — HackFest by Agora: Developed a real-time communication feature leveraging Agora SDK under a 24-hour hackathon constraint.
